Election/Restrictions

1. The election/restriction requirement mailed September 30, 2002 has been vacated and a new election/restriction requirement is set forth below.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I-III. Claim 1, drawn to an isolated polypeptide, wherein the said polypeptide is SEQ ID NO: 1 (APOP-1); SEQ ID NO: 3 (APOP-2); and SEQ ID NO: 5 (APOP-3), respectively, classified in class 530, subclass 350.
 - IV-VI. Claims 10, 30, 31, 33, 35-42, 51 and 52, drawn to an isolated antibody that specifically binds to a polypeptide, wherein the said polypeptide is SEQ ID NO: 1 (APOP-1); SEQ ID NO: 3 (APOP-2); and SEQ ID NO: 5 (APOP-3), respectively, classified in class 530, subclass 387.1.
 - VII-IX. Claims 29, 43 and 44, drawn to a diagnostic test used in a methods for detecting and purifying a polypeptide comprising using an isolated antibody that specifically binds to a polypeptide, wherein the said polypeptide is SEQ ID NO: 1 (APOP-1); SEQ ID NO: 3 (APOP-2); and SEQ ID NO: 5 (APOP-3), respectively, classified in class 436, subclass 512.
 - X-XII. Claims 32 and 34, drawn to a method of diagnosing a condition/disease administering comprising a composition of an isolated antibody that specifically binds to a polypeptide, wherein the said polypeptide is SEQ ID

NO: 1 (APOP-1); SEQ ID NO: 3 (APOP-2); and SEQ ID NO: 5 (APOP-3), respectively, classified in class 514, subclass 8.

3. The inventions are distinct, each from the other because of the following reasons:

Groups I-VI are structurally and functionally different products, which are made by different methods and have different uses.

The methods of Groups VII-XII differ in the method objectives, method steps and parameters and in the reagents used. The examination of all groups would require different searches in the U.S. Patent Shoes and the scientific literature and would require the consideration of different patentability issues.

Inventions of Groups X-XII and Groups VII-IX are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Groups X-XII are drawn to *in vivo* methods and Groups VII-IX are drawn to *in vitro* methods.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1642

5. A telephone call was made to David G. Streeter, Ph.D. on September 30, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
